

## Showcasing the UK Photonics and Quantum Industry

Please join us for a Breakfast Showcase of the UK Photonics and Quantum Industry on Wednesday, 6th July 2022, 8:30 – 10:00 hrs.\*

Responsible for a £14.5bn UK Industry output, Photonics is the 5<sup>th</sup> most productive manufacturing sector in the UK, employing more people than pharmaceutical production. The Showcase will feature over 20 examples of the latest UK photonics products and quantum innovations from across the UK, providing an opportunity to meet firsthand with industry representatives and discuss how to support the industry vision to reach a £50 bn industry by 2035.

**\*RSVP to Karin Burger, [karin@spieurope.org](mailto:karin@spieurope.org)**

To support the photonics companies, whose international reputation means many export over 80% of what they manufacture, and the UK's burgeoning quantum industry in your constituency, and get the latest industry briefings please engage with the APPG via Carol Monaghan, MP, and/or contact [appg@photonicsuk.org](mailto:appg@photonicsuk.org)

"**Photonics**" includes the sciences, techniques and products that generate, transmit, process and capture light of all types. "**Quantum**" technology, includes quantum communications, quantum imaging, quantum computing and cryptography leveraging superposition and entanglement phenomena.

SPIE Europe Ltd is the Secretariat for the  
APPG on Photonics
